After a powerful webinar that included educators from ten cities explaining the many incredible actions they took in support of the national Black Lives Matter at School week of action, Denisha

Jones, contacted Jesse Hagopian to propose that they collect these stories in a book. Black Lives Matter at School succinctly generalizes lessons from successful challenges to institutional racism that have been won through the BLM at School movement. This is a book that can inspire many hundreds or thousands of more educators to join the BLM at School movement. US Senate Health, Education, Labor And Pensions Committee Handbook Walkout! Contemporary Music Education Hearings Before a Subcommittee of the Committee on Appropriations, House of Representatives, One Hundred Eighth Congress, Second Session Forum Bob Carr The Iowa Precinct Caucuses Teacher unions and their members have long stood as polarizing figures in a vast educational landscape. As in the Western films of the 1920s, policymakers, education reformers, and onlookers often assign union leaders and the teachers they represent either the white hats of heroes or the black hats of villains. Politicized efforts to reductively classify teacher unions as beneficial or dangerous have only served to

obscure the extent to which labor militancy and teacher activism have become part and parcel of the American public school system and the primary mechanisms by which teachers' voices are heard — and heeded — in the policy arena. Teacher unions have grown in tandem with and in response to the expansion of the school bureaucracy and the acceleration of accountability reforms, and teachers' calls for recognition and reform are inseparable from broader movements for social change. Far more than either good or bad, teacher unions are the inevitable outgrowth of American public education as it stands today. This book offers an interdisciplinary exploration of the state of modern teacher unions, the complex spaces they operate in, and the connections between militancy, activism, and school reform. Breaking free from the white hat/black hat dyad that has for so long colored the lenses we use to understand unions, the chapters of this book engage a set of fundamental questions: Where did the modern moment of militancy come from, and in what ways is it a continuation or a departure from the approaches of previous organized teachers?; What is at stake in modern expressions of militancy for teachers, communities, and schools?; Beyond the flashpoint of the walkout, what is the effect of teacher activism? Although some people refer to Iowa as "flyover country," presidential candidates and political reporters in the national press corps have no difficulty locating the state every four years at the beginning of presidential primary season. When Iowa Democrats pushed forward their precinct caucuses in 1972, the

Iowa caucuses became the first presidential nominating event in the nation. Politicos soon realized the impact of Iowa's new status and, along with the national media, promoted the caucuses with a vengeance. The Iowa Precinct Caucuses chronicles how the caucuses began, how they changed, and starting in 1972 how they became fodder for and manipulated by the mass media. Hugh Winebrenner and Dennis J. Goldford argue that the media have given a value to the Iowa caucuses completely out of proportion to the reality of their purpose and procedural methods. In fact, the nationally reported "results" are contrived by the Iowa parties to portray a distorted picture of the process. As presidential primaries have grown in the media spotlight and superseded the parties' conventions, Iowa has become a political proving ground for the confident, the hopeful, and the relatively unknown, but at what cost to the country? The third edition of this classic book has been updated to include the elections of 2000, which saw the first winner of the Iowa caucuses to reach the White House since 1976; of 2004 and the roller-coaster fortunes of Howard Dean and John Kerry; and of 2008 and the unlikely emergence of Barack Obama as a presidential contender. 1996 Parliamentary Debates El Mirlo Includes section "Books and reports." The Chicago Teachers Union strike was the most important domestic labor struggle so far this century—and perhaps for the last forty years—and the strongest challenge to the conservative agenda for restructuring education, which advocates for more charter schools and tying teacher salaries to standardized testing, among other changes. In 2012, Chicago teachers built a grassroots movement through education and engagement of an entire union membership, taking militant action in the face of enormous structural barriers and a hostile Democratic Party leadership. The teachers won massive concessions from the city and have become a new model for school reform led by teachers themselves, rather than by billionaires. Strike for America is the story of this movement, and how it has become the defining struggle for the labor movement today. What We Believe

This edited volume highlights relevant issues and solutions for diversity groups within the workplace. It explores issues of identity as they relate to attributes of gender, age, migrant labor, disability, and power in social spaces. Identity is rarely well-defined in many social spaces, and understandings that define belonging are often developed through the normative expectations of others. Having an evidence-based approach in addressing these relevant issues, this book will appeal to academics and practitioners alike looking for practical and theoretical solutions to improving the situations of these groups in paid employment.

A political insider offers a revealing perspective and examines the public and private life of BC's controversial premier. In the blood-sport arena of provincial politics, BC's enigmatic premier, Christy Clark, has defied the pundits to win both party leadership and an upset election victory against all odds. Made deputy premier in 2001 shortly after her first foray into public life, she shunned Gordon Campbell's cabinet solidarity to return to private life in 2004. After a bold run at becoming Vancouver's mayor, she launched a successful media career as a CKNW talk show host. In 2011, she surrendered that security

and entered the Liberal leadership race, shocking the party's inner circle as she claimed her spot as Campbell's successor. The campaigner known in her home province simply as Christy has been underestimated by many. Since her surprising usurpation of the BC Liberal Party in 2011 and their stunning re-election in 2013, BC's first elected female premier has ruffled more than a few feathers; she has also won many new supporters while employing her own unique leadership style. In this revealing look at the woman behind the trademark smile, political insider Judi Tyabji traces Clark's journey from middle-class roots to her political awakening and rapid rise to power. Based on meticulous research and extensive interviews with over thirty public figures and the premier herself, Tyabji's "Christy Clark: Behind the Smile" paints an intimate portrait of one of the most influential women in Canadian politics today.

In reaction to the changes imposed on

public schools across the country in the name of "education reform," the Chicago Teachers Union redefined its traditional role and waged a multidimensional fight that produced a community-wide school strike and transformed the scope of collective bargaining into arenas that few labor relations experts thought possible. Using interviews, first-person accounts, participant observation, union documents, and media reports, Steven K. Ashby and Robert Bruno tell the story of the 2012 strike that shut down the Chicago school system for seven days. *A Fight for the Soul of Public Education* takes into account two overlapping, parallel, and equally important stories. One is a grassroots story of worker activism told from the perspective of rank-and-file union members and their community supporters. Ashby and Bruno provide a detailed account of how the strike became an international cause when other teachers unions had largely surrendered to corporate-driven education reform. The second story describes the role of state and national politics in imposing educational governance changes on public schools and draconian limitations on union bargaining

rights. It includes a detailed account of the actual bargaining process revealing the mundane and the transcendental strategies of both school board and union representatives. In an era defined by political polarization, both major U.S. parties have come to share a remarkably similar understanding of the education system as well as a set of punitive strategies for fixing it. Combining an intellectual history of social policy with a sweeping history of the educational system, Daniel S. Moak looks beyond the rise of neoliberalism to find the origin of today's education woes in Great Society reforms. In the wake of World War II, a coalition of thinkers gained dominance in U.S. policymaking. They identified educational opportunity as the ideal means of addressing racial and economic inequality by incorporating individuals into a free market economy. The passage of the Elementary and Secondary Education Act (ESEA) in 1965 secured an expansive federal commitment to this goal. However, when social problems failed to improve, the underlying logic led policymakers to hold schools responsible. Moak documents how a

vision of education as a panacea for society's flaws led us to turn away from redistributive economic policies and down the path to market-based reforms, *No Child Left Behind*, mass school closures, teacher layoffs, and other policies that plague the public education system to this day. From the New Deal to the War on Schools *How Cold War Engineers and Artists Forged a New Creative Culture* Congressional Record *Discrimination Against Women, Hearings Before the Special Subcommittee on Education...* *A Black Lives Matter Principles Activity Book* *Gay and Lesbian Educators Tell Their Stories* This book examines the push and pull of factors contributing to and constraining conversion of STEM (science, technology, engineering and math) education programs into STEAM (science, technology, engineering, math and arts) education programs. The chapters in this book offer thought-provoking examples, theory, and suggestions about the advantages, methods and challenges involved in making STEM to STEAM conversions, at levels ranging from

K12 through graduate university programs. A large driving force for STEM-to-STEAM conversions is the emerging awareness that the scientific workforce finds itself less than ideally prepared when engaging with so-called 'wicked problems' – the complex suite of emerging, multifaceted issues such as global climate change, social injustice, and pandemic diseases. Dealing with these issues requires cross-disciplinary expertise and the ability to insert technical and scientific understanding effectively into areas of public planning and policy. The different models and possibilities for STEAM, as the next phase of the STEM revolution, laid out in this book will promote research and further our understanding of STEAM as a forward-thinking approach to education. This book offers many worthwhile suggestions on how to do that deliberately and systematically George DeBoer, Project 2061 of the American Association for the Advancement of Science, USA For the last several years, calls for expanding STEM education have grown, but so too have concerns about technocratic approaches to STEM. This volume challenges the community to consider broader views on

STEM by focusing on the place of arts education within this movement. The chapters offer much needed, new perspectives on the (re)integration of the arts and sciences Troy Sadler, School of Education, University of North Carolina, USA Chronicles Bob Carr's years of leadership and opposition, steering New South Wales through good and bad times, including the most successful Olympic Games ever. The creative collaborations of engineers, artists, scientists, and curators over the past fifty years. Artwork as opposed to experiment? Engineer

versus artist? We often see two different cultural realms separated by impervious walls. But some fifty years ago, the borders between technology and art began to be breached. In this book, W. Patrick McCray shows how in this era, artists eagerly collaborated with engineers and scientists to explore new technologies and create visually and sonically compelling multimedia works. This art emerged from corporate laboratories, artists' studios, publishing houses, art galleries, and university campuses. Many of the biggest stars of the art world—Robert Rauschenberg, Yvonne Rainer, Andy Warhol, Carolee Schneemann, and John Cage—participated, but the technologists who contributed essential expertise and aesthetic input often went unrecognized. Coming from diverse personal backgrounds, this roster of engineers and scientists includes Frank J. Malina, the American rocket pioneer-turned-kinetic artist who launched the art-science journal Leonardo, and Swedish-born engineer Billy Klüver, who established the group Experiments in Art and Technology (E.A.T). At schools ranging from MIT to Caltech, engineers engaged with such figures as artist Gyorgy Kepes and celebrity curator Maurice Tuchman. Today, we are in the midst of a new surge of corporate and academic promotion of projects and programs combining art, technology, and science. Making Art Work reveals how artists and technologists have continually constructed new communities in which they exercise imagination, display creative expertise, and pursue commercial innovation. Gay and lesbian teachers have traditionally dwelt in the deepest of closets. But increasing numbers of young people are now served by teachers who are out and proud. Here, for the first time, educators from all regions of the country tell about their struggles and victories, as they have put their own careers at risk in their fight for justice.
This powerful activity book will engage hands, hearts, and minds as it introduces children to the guiding principles of the Black Lives Matter movement. When the Black Lives Matter movement began in 2013, the three founders--Alicia Garza, Patrisse Khan-Cullors, and Opal Tometi--anchored its work in a list of guiding principles, developed through conversation with other activists. These principles commit the movement to empathy, loving engagement, and just action among its participants; affirm the importance of Black women, families, elders, and LGBTQ folk; and celebrate the strength and diversity of Black

people in their communities and around the globe. Now young people can explore these powerful principles in *What We Believe: A Black Lives Matter Principles Activity Book*. Created by two teachers with more than thirty-five years of educational experience between them, the book presents the guiding principles in down-to-earth, child-friendly language, with each principle accompanied by writing prompts, space for children or adults to create their own reflections, and a coloring page. Supporting materials guide adults in sharing the principles with children and encourage kids to dream big and take action within their communities. An essential resource for anyone discussing racial equity with young people, *What We Believe* offers a beautiful and inspiring lens on the most important social justice movement of our time. Lee & Low Books will donate a portion of its proceeds from the book to the Black Lives Matter Global Network Foundation, Inc.
